

## Something to do 6: looking for letters

Here are some letters of the alphabet. How many things can you see that start with these letters?

s

c

a

h

k

p

e

w

t

m

d

r

f

Which letter has the most entries? Which one has the least? Can you make a bar graph showing your results?

Think of another way that you could group your objects (eg colour, or size, or shape, or the kind of object). Regroup the objects, then make a new bar graph for the results.
